University of Edinburgh

## The Evolution of Linguistic Structure

### Where Learning, Culture and Biology Meet

Language is striking in its systematic structure at all levels of description. Where does this structure come from? Why is language systematic, and where else might we expect to find this kind of systematicity in nature?

Sponsored by the UMass  
Initiative in Cognitive Science  
and by the 5 Colleges Seminar  
in Cognitive Science

**Friday, April 22, 2016**

**3:30pm**

Integrative Learning Center N101

*Free and open to the public*
