

LINGUIST 397LH
Hartman/Oiry
HW 4
Due Thurs. 10/15/15

Explore the Speech Accent Archive (http://accent.gmu.edu/browse_language.php). Choose one language and browse through its recordings (and IPA transcriptions if provided.) Please choose a language that has more than 1 recording.

Then write a description of the phonological changes that you observe in the speakers of this language, using many specific examples. How consistent are these changes? What similarities and differences do you observe among the different individual speakers? What do your observations suggest about the phonemic inventory and/or phonotactics of these speakers' L1?

Your write-up should be thorough but not longer than 1 single-spaced page.
